

Transformation Cap

© Design and diagram: Heinz Strobl, Feb. 1992

You can convert the mitre into a fool's cap or legionary's cap by doing steps 19 to 22. The legionary's cap is the fool's cap put on upside down. To convert it back to the mitre reverse the order and movements of these steps. To make the transformation from step 21 to 20 insert your fingers into the top of the fool's cap and draw it apart. For a cap that fits your head use a stripe of paper half as wide as the circumference of your head.
